6. Lever for upward & downward moving
7. Pressure Meter
8. Fine-tuning Adjuster
9. Cutter
10. Guide
11. Disposable Vise
12. Spring Stopper for SB keys
13. Wheel Handle to move left & right

Correction procedure

Before delivery, each key machine undergoes rigorous corrective steps to ensure the precision of duplicating process.

Fix the same type of blank key on two vises and install the guide, then fasten the cutter.

Press the lever to let the cutter and guide touch the blank keys at the same height, then to fasten tightly.

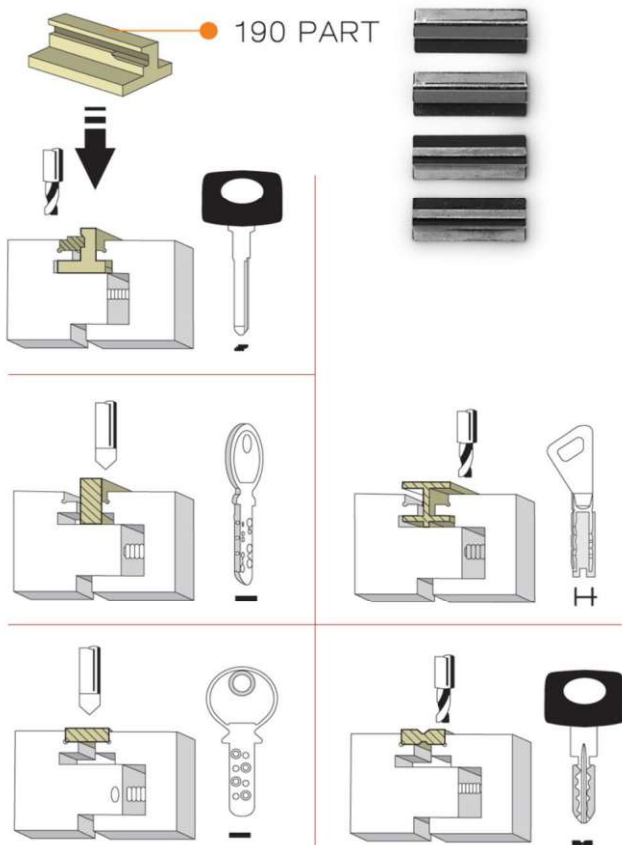

When the cutter is not accurate, adjust the fine-tuning adjuster to make cutter slightly touch the surface of key, as the standard of accuracy.

Accessories

with 190 & 190-2 two kinds of accessories

306B

**Key Duplicating Machine for Dimple Keys
– Basic Type–**

Fixed Vise Table & Disposable Vises
(brushless motor as option)
